# Index

## Volume 31 Nos 1–10
## January/February–December 1989

### SUBJECT INDEX

*abstraction model* 39
*advertising* 268
*algebraic specifications* 357
*algorithms* 529
Application of spreadsheet software in software engineering measurement technology 477
*architectures* 512
*authorization mechanism* 290
*automated design* 456
*automated tools* 99

BOOKS AND PUBLICATIONS
**Ashworth, G and Thornton, A (eds)** Technology transfer and innovation 106
**Avison, D E and Fitzgerald, G** Information systems development: methodologies, techniques and tools 285
**Bahrami, A** Designing artificial intelligence based software 453
**Barrett, M L and Beerel, A C** Expert systems in business: a practical approach 165
**Bergstra, J A, Heering, J and Klint, P (eds)** Algebraic specification 561
**Brandin, D H and Harrison, M A** The technology war: a case for competitiveness 106
**Brown, P** Electronics and computer acronyms 51
**Bullinger, H-J and Gunzenhauser, R (eds)** Software ergonomics: advances and applications 340
**Date, C J** A guide to Ingres 223
**Diller, A** Compiling functional languages 222
**Farkas, D** Unix for programmers – an introduction 508
**Feldman, M B** Data structures with Modula-2 562
**Filipic, B** PROLOG user's handbook: a library of utility programs 560
**Fisher, A S** CASE – using software development tools 560
**Gehani, N and McGettrick, D (eds)** Software specification techniques 451
**Gray, P M D and Lucas, R J (eds)** Prolog and databases: implementations and new directions 396
**Harland, D M** Rekursiv object-oriented computer architecture 339
**Hawryszkiewycz, I T** Introduction to systems analysis and design 52
**Hekmatpour, S and Ince, D** Software prototyping, formal methods and VDM 164
**Henderson, J** Software portability 509
**Hille, R F** Data abstraction and program development using Pascal 51
**Hills, S (ed)** Information handling techniques for the office – full text rules OA? 339
**Holloway, S** Data administration 53
**Kaner, C** Testing computer software 341
**Kelly, B and Rector, A (eds)** Research and development in expert systems V: Proceedings of Expert Systems '88 451
**Kirakowski, J** Human computer interaction: from voltage to knowledge 393
**Krakowiak, S** Principles of operating systems 164
**Loeckx, J, Mehlhorn, K and Wilhelm, R** Foundations of programming languages 221
**Long, L** Introduction to computers and information processing 396
**Lyon, D** The information society: issues and illusions 106
**Macro, A and Buxton, J** The craft of software engineering 562
**Manns, T and Coleman, M** Software quality assurance 285
**Michaelson, G** An introduction to functional programming through Lambda calculus 393
**Mills, H D** Software productivity 283
**Mitchell, R** Industrial software technology 222
**Mittra, S S** Structured techniques of system analysis, design and implementation 284
**Nebendahl, D** Expert systems: introduction to the technology and applications engineering and communications 109
**Olle, T W, Verrijn-Stuart, A A and Bhabuta, L (eds)** Computerized assistance during the information systems life cycle 394
**Olle, T W, et al.** Information systems methodologies: a framework for understanding 394
**Pinson, L J and Wiener, R S** An introduction to object-oriented programming and Smalltalk 221
**Pressman, R S** Making software engineering happen: a guide for instituting the technology 52
**Ridley, P and Seddighi, H** Economic modelling and computer programming 283
**Roetzheim, W H** Structured computer project management 397
**Shorrock, B** Systems design and HCI 341
**Shriver, B and Wegner, P (eds)** Research directions in object-oriented programming 453
**Simons, G** Is God a programmer?: religion in the computer age 452
**Smith, K** Corporate accounting systems: a software engineering approach 53
**Smith, P** An introduction to Lisp 559
**Thomas, P, Robinson, H and Emms, J** Abstract data types: their specification, representation, and use 559
**Tracz, W (ed)** Software reuse: emerging technology 284
**Watts, R** Application generators using fourth-generation languages 508
**Wiener, R S and Pinson, L J** An introduction to object-oriented programming and C++ 108
**Yang, R** P-PROLOG, a parallel logic programming language 395
*business analysis* 99

*CASE* 346
*case study* 203, 276, 411, 420, 472, 549
*CASE tools* 99, 346, 486, 549
CASE: guidelines for success 346
*change classification* 59
*checkpoint* 85
*COCOMO* 251
*computer-aided software engineering* 346
*computer-based information system-development models* 351
*computer-integrated manufacturing* 429
*concurrency* 371
*consistency* 85
*constraints* 402
Control of software prototyping process: change classification approach 59
Controlling user authorization in relational database management systems 290
*correctness* 67, 472
Critical analysis of tools for computer-aided software engineering 486

*data modelling* 313, 402, 521
*data processing* 546
*database constraints* 497
*database environments* 546
*database management systems* 29, 290
*database security* 290
*databases* 29, 39, 85, 402, 497, 521
*dataflow diagrams* 456
*deliverables* 351
*design* 529
*design automation* 486
*design methodologies* 239, 276
Design of monitoring system for distributed applications 295
*design tool* 276
*development methods* 99
*distributed databases* 29
*distributed systems* 295, 535
*documentation standards* 546

*economics models* 258
Economics of software project management in Tunisia: basic TUCOMO 251
*entity-relationship approach* 313
*errors* 472
Evaluation method for user requirements documents 181

# index

*evolution* 351
*evolutionary delivery* 7
Experiences in use of SSADM: series of case studies. Part 1: first-time users 411
Experiences in use of SSADM: series of case studies. Part 2: experienced users 420
*expert systems* 239, 313, 366
*expert-systems development* 366
Express: proposal for uniform notations 143

*failures* 472
*fairness* 371
*fairness behaviour* 371
*fairness constraints* 371
Formal description of realtime systems: a review 67
*formal methods* 7, 324, 357
*formal specification* 324
*FORTRAN* 305
*fourth-generation languages* 189, 203, 276
FRESH: expert-system shell with foundation in data modelling 313
From database to information base: some questions of semantics and constraints 402
From semantic data models to object orientation in design 39
*functional platforms* 136

*graphical interface* 305
Graphical interface to Toolpack/1 305

*hardware products* 231
*hierarchical decomposition* 429
*hybrid metrics* 477

Identification of errors in software requirements through use of automated requirements tools 472
Implementation of an integrated multidatabase-PROLOG system 29
Implementation of structured methodology into credit institution 549
*implied constraints* 497
Increasing the power of fourth-generation report generators 189
*incremental delivery* 7
*incremental development* 7
Incremental development: review of nonmonolithic life-cycle development models 7
*inference rules* 497
Information and software economics 226
*information engineering* 99
*information metric flow* 91
*information systems* 99, 123, 290, 486
Integral: Petri-net approach to distributed software development 535
*integrity* 402
*interface specifications* 136
Introduction to object-oriented databases 521
Investigation of predictors of failures and debugging effort for large MIS 170
*IPSE* 39

Knowledge-based environment for investigating multicomputer architectures 512
*knowledge-based environments* 123, 512
Knowledge-based support for requirements engineering 123

*layout algorithms* 456
*life-cycle models* 7, 477

*main memory* 85
*maintenance* 170
Mapping strategies for software businesses 231
*measurement* 477
*metaprogramming* 239
*methodologies* 21, 91, 351, 486
*metrics* 91
Metrics, outlier analysis and the software design process 91
*MIS* 170
Model of system evolution 351
Mondrian: system for automatic generation of dataflow diagrams 456
*monitoring system* 295
*multicomputers* 512
*multidatabases* 29

*nondeterminism* 371
*nonmonolithic life-cycle models* 7
*nonredundancy* 497
*normalization* 115
*notational standard* 143
Notes on algebraic specification 357

*object-oriented databases* 39, 521
*object-oriented design* 429
*object-oriented programming* 239, 512
*operating system interfaces* 136
*outlier analysis* 91

*parallel processing* 512
Past and future trends for portable tools interfaces 175
*PCTE* 136
PCTE – a remarkable platform 136
*performance* 67, 85
*Petri nets* 429, 535
*portable tools interfaces* 175
*process control* 59
*program efficiency* 77
*program slicing* 77
*programming environment* 324
*programming languages* 143
*programming techniques* 529
*project management* 59, 276
*PROLOG* 29
*proof procedure* 497
Proof procedures for detecting redundancy of database constraints 497
*prototyping* 7, 59, 203, 276, 429, 438
Prototyping discrete manufacturing systems 429
*PTI* 175
*public tools interfaces* 175

*query languages* 29
*query optimization* 29

*realtime programs* 67
*realtime systems* 67
*recovery* 85
Recovery in main memory database systems for engineering design applications 85
*relational algebra* 115
*relational data model* 402
*relational databases* 2, 115, 402
Relational databases: a theoretical primer 115
*relational languages* 2
*reliability* 366, 477
*report generators* 189
*requirements* 67, 472
*requirements document* 181
*requirements engineering* 123
*requirements specification* 143, 181
*requirements specification methodologies* 7
*responsibility sharing* 438
Responsibility sharing between sophisticated users and professionals in structured prototyping 438
Results of survey of use of SSADM in commercial and government sectors in United Kingdom 21
Retrospective software specification 324

*salmon effect* 7
*scheduling* 67
Selection and application of a fourth-generation language in a large textile group 203
Selection and application of design tool and fourth-generation language for commodity handling and trading system 276
*semantic data modelling* 521
*semantic data models* 39
*semantics* 67, 402
*sequential programming* 529
*sequential programs* 77
*simulation* 429
*simulation modelling* 512
Soapware: the fit between software and advertising 268
*software complexity measures* 170
*software cost estimation* 251
*software design* 77, 91
*software development process* 7
*software economics* 231, 239, 251, 258, 268
*software life-cycle* 251, 535
*software management* 7, 251
*software market* 268
*software measurement* 170
Software methodology in the harsh light of economics 239
*software metrics* 477
*software pricing* 268
*software production* 231, 268
*software productivity* 258
*software products* 231
*software reuse* 239, 258
Software reuse – key to enhanced productivity: some quantitative models 258
*software specification* 143, 324
*software testing* 535
*software theft* 268
*software tools* 305, 366
*software use* 268
*specification* 67, 77, 181, 472, 546
*specification languages* 324, 429
*specification method* 535
Specification of database systems using traditional documentation techniques 546
*spreadsheet software* 477
*SQL* 2, 115
SQL – problems with an emerging standard 2
*SSADM* 21, 203, 411, 420
*standards* 2, 546
*structured methods* 411, 420, 438, 549
*structured programming* 203
*structured prototyping* 438
*structured systems analysis* 456
*support environments* 351
Survey of fairness notions 371
*system behaviour* 295
*system states* 351
*systems analysis* 99, 486
*systems analysis and design* 411, 420

*systems development* 21, 59, 346, 438
*systems development methods* 123

*Ten15* 175
Termination-indicator technique as structured programming tool 529
*theory* 529
Time to change the culture of information systems departments 99
*Toolpack* 305
*tool-intensive development* 7
*transformation* 77
Two ways of slicing programs 77
*user interface* 305
*user sophistication* 438
Using expert-system components to add intelligent help and guidance to software tools 366

*validation and verification* 535

## AUTHOR INDEX

**Aoyama, M** see Chang, C K

**Bell, D A, Grimson, J B and Ling, D H O** Implementation of an integrated multidatabase-PROLOG system 29
**Bianchi, L** Selection and application of design tool and fourth-generation language for commodity handling and trading system 276
**Bowers, D S** From database to information base: some questions of semantics and constraints 402
**Bradley, I M** Notes on algebraic specification 357
**Broom, M A, Holmes, S P and Hopkins, T R** Graphical interface to Toolpack/1 305
**Brown, A W** From semantic data models to object orientation in design 39
**Butler, K** Selection and application of a fourth-generation language in a large textile group 203

**Carver, D L** see Cordes, D W
